NTP[®]
 NATIONAL TOILET
 PARTITIONS

Experience the Difference

Because All Lockers are **NOT** Created Equal...

Your Lockers Will Be More Hygienic and Safer

Phenolic® from National Toilet Partitions® is available in both ASTM E84-07 Class A & B Fire Ratings, thus ensuring a safe and secure environment. NTP is proud to announce that we have developed the first HDPE Antimicrobial locker. A powerful antimicrobial agent called Columbia Guard® can be added to our PolyLife Lockers® for a unit that will kill and prevent the growth and spread of virus, bacteria, fungi and dangerous staphs like MRSA.

PolyLife® Lockers are Available in All Colors in the Following

Standard (Non Fire Rated)
ASTM E84-07 Class A Fire Rated
ASTM E84-07 Class B Fire Rated
Antimicrobial ASTM E84-07 Class A Fire Rated
Antimicrobial ASTM E84-07 Class B Fire Rated

Your Maintenance Costs Will Drop

Phenolic® from National Toilet Partitions® is Graffiti Resistant. Permanent marks are easily removed with household cleaners and guaranteed not to shadow. The hard surface makes cutting and scratching the partitions extremely difficult. PolyLife® and Terra Core® Lockers do not reveal a different color when scratched and are Graffiti Resistant.

Cleaning Made Simple

Our Phenolic and Terra Core® are both REAL Phenolic. NTP Phenolic, Terra Core® and PolyLife® are impervious to water and can be washed without any damage to the material.

Your Lockers Will Last

Our patented Mortise and Tenon design will provide you with the toughest and most aesthetically pleasing Phenolic and HDPE Lockers available.
